Subject: Update About your request on soil sampling and re-entry plans
Date: Friday, April 19, 2013 2:40:36 PM

TCEQ (Derek Eades) OK with EPA taking on off site soil sampling. Suggested we could split sample on-site soils. TCEQ also said that they have not been consulted on re-entry. The ATF/State re-entry criteria appears to consider factors such as structural, no bodies, no natural gas etc. TCEQ has not been consulted on any potential environmental issues, however they do not think there are any offsite environmental concerns, believing all pesticides would have been consumed by the fire/explosion. It is undetermined when access to the facility property will be available and at this time TCEQ does not have any plans to request EPA assistance for on-site cleanup. This may change but that is the understanding at this time. TCEQ is in the process of putting together a "demand letter" to the RP.
